Create B2B campaigns that drive action

Achieve your acquisition objectives and improve results by delivering a message that drives more prospects to take action. Target the right business with the right message at the right time, delivered right to their business.

Leverage better data for better marketing results

Better data means better marketing results. Smartmail Marketing™ Audiences apply the power of Canada Post's database to provide you with a national reach of current and active businesses, big or small. Our comprehensive geolocation database is one of Canada's largest and most actionable, providing lists that blend reach and accuracy.

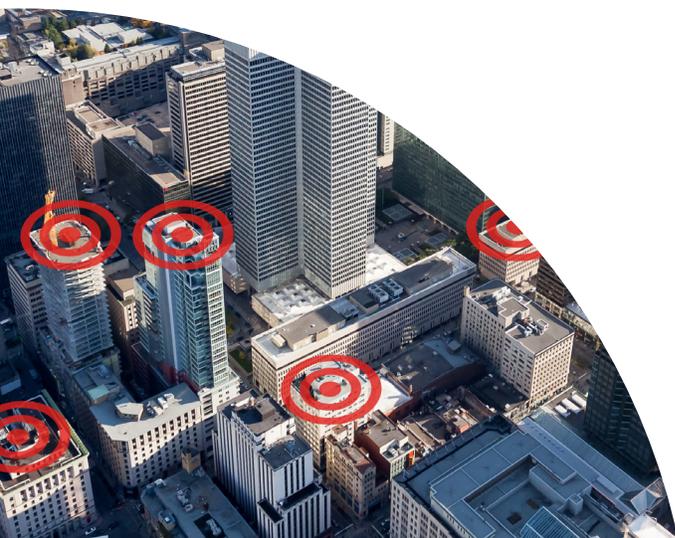

Target with precision

Benefit from a range of targeting filters to reach your best audience – delivering effective campaigns directly into the hands of business decision makers to drive higher response.

Access clean business address data

We've built our foundational intelligence in a way that helps your message be heard. Our comprehensive business database is refreshed on a monthly basis and validates each record to ensure accuracy and completeness. Keeping business lists up to date is important, as there are approximately 100K new businesses that open, and the same number closes every year.¹ Validating based on who still receives mail is important to ensure accuracy.
