

Dog Bite Awareness

Every day in Canada there are millions of interactions between dogs and people, and most of them are positive.

However, there are more than 500 dog bite incidents to Canada Post delivery personnel each year.

Dogs that are properly trained, socialized and kept under control are less likely to bite.

Did you know?

- Having your pet spayed or neutered can decrease aggression
- A trained and socialized dog is a better behaved dog

With your help, we can make our community a safer place and reduce the number of dog bites.
